

Progression in skills in Science

<u>2021 – 2022</u>

Торіс						
Covered	¥1	Y2	Y3	Y4	Y5	¥6
Plants	Pupils should be taught to: -identify and name a variety of common wild and garden plants, including deciduous and evergreen trees. -identify and describe the basic structure of a variety of common flowering plants, including trees.	Pupils should be taught to: -observe and describe how seeds and bulbs grow into mature plants. -Find out and describe how plants need water, light and a suitable temperature to grow and stay healthy.	Pupils should be taught to: -identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers. -explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant. -investigate the way in which water is transported within plants. -explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.			
Forces and Magnets			 Pupils should be taught to: -compare how things move on different surfaces. -notice that some forces need contact between two objects, but magnetic forces can act at a distance. -observe how magnets attract or repel each other and attract some materials and not others. -describe magnets as having two poles. -predict whether two magnets will attract or repel each other, depending on which poles are facing. -compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet. 		 Pupils should be taught to: explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object. identify the effects of air resistance, water resistance and friction that act between moving surfaces. recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect.

Y4

		Rocks and Soils	States of Matter	Properties of Materials
Pupils should be taught to:	Pupils should be taught to:	Pupils should be taught to:	Pupils should be taught to:	Pupils should be taught to:
 -distinguish between an object and the material from which it is made. -identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock. -describe the simple physical properties of a variety of everyday materials. -compare and group together a variety of everyday materials on the basis of their simple physical properties. 	 -identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses. -find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching. 	 -compare and group together different kinds of rocks on the basis of their appearance and simple physical properties. -describe in simple terms how fossils are formed when things that have lived are trapped within rock. - recognise that soils are made from rocks and organic matter. 	 -compare and group materials together, according to whether they are solids, liquids or gases. -observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C). -identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature. 	 -compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets. -know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution. -use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and

Material

Y6

	¥1	Y2	Y3	Y4	Y5	Y6
Earth and Space	Y1	Y2	Y3	Y4	Pupils should be taught to: -describe the movement of the Earth, and other planets, relative to the Sun in the solar system. -describe the movement of the Moon relative to the Earth. -describe the Sun, Earth and Moon as approximately spherical bodies. -use the idea of the Earth's rotation to explain day and	Υδ
Seasonal Change	Pupils should be taught to: -observe changes across the four seasons. -observe and describe weather associated with the seasons and how day length varies. -observe changes to the natural environment across the 4 seasons. -observe changes in the temperature across the 4 seasons. -observe changes in the rainfall across the 4 seasons.				night and the apparent movement of the sun across the sky.	

Light Pupils should be taught to:	Electricity		Y1	Y2	Y3	Y4	Y5	Y6
Electricity lamp or the volume of a buzzers -construct a single series of cells used in the circuit. - analyzis basic parts. - compare and give reasons for some series in the under series. - indicating cells. Wires, builds, - compare and give reasons for cells used in the circuit. - indicating cells. Wires, builds, - compare and give reasons for circuit. - identify whether or not a lamp biffightess of builds, the loadness of buzzers and the load bese as circuit and load associate this whether or no or load many lists the loads attery. - use recognise that switch persons and associate this whether or no bese a learny lists in a single circuit and associate the switch being good conductors. Pupils should be taught to: - recognise that switch persons and associate the switch being good conductors. Fught - recognise baca fught f	Electricity Imp or the volume of a buzzers -construct a simple series -construct a simple series electricity -construct a simple series including cells, wires, bulbs, - compare and give reasons for including cells, wires, bulbs, including cells, wires, bulbs, - compare and give reasons for including cells, wires, bulbs, including cells, wires, bulbs, - compare and give reasons for on off position of switches. individue cells, wires, bulbs, - compare and give reasons for on off position of switches. individue cells, wires, bulbs, - compare and give reasons for on off position of switches. individue cells, wires, bulbs, switches and buscers. - compare and give reasons for on off position of switches. individue cells, switches and buscers. - compare and give reasons for on off position of switches. -congaine that whether or nor off position of switches. - congaines that wire, switch and associate the switch opens arecognise that they need light in order to see thing good conductors. Pupils should be taught to: -recognise that they need light in order to see things and that dark is the absence of light. -use the idea that light travels in straight lines to explain the absence of light. -ontice that ight is a single cross in reference light in the reference for surfaces. -epi and that there are ways to protect their eyes.					Pupils should be taught to:		Pupils should be taught to:
-recognise that they need -use the idea that light travels light in order to see things -use the idea that light travels and that dark is the in straight lines to explain that absence of light. objects are seen because they -notice that light is give out or reflect light into the reflected from surfaces. eye. -recognise that light from -explain that we see things because light travels from light and that there are ways to protect their eyes. light sources to our eyes. -recognise that shadows are then to our eyes. formed when the -use the idea that light travels light from a light source is in straight lines to explain why blocked by a solid object. shadows have the same shape -find patterns in the way as the objects at at them.	Light -recognise that they need light in order to see things and that dark is the absence of lightuse the idea that light travels in straight lines to explain that absence of lightnotice that light is reflected from surfacesrecognise that light from -recognise that light from -recognise that light from and that there are ways to protect their eyesrecognise that shadows are formed when the light from a light source is light from a light source is light from as the objects and -use the idea that light travels in straight lines to explain that shadows have the same shape -find patterns in the way that the size of shadows -recognise that use of shadows -recognise that cast themrecognise that shadows are -recognise that shadows -recognise -recognise that shadows -recognise -recogni	Electricity				that run on electricity. -construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers. -identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery. -recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit. - recognise some common conductors and insulators, and associate metals with being		 lamp or the volume of a buzzer with the number and voltage of cells used in the circuit. compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches. use recognised symbols when representing a simple circuit in a diagram.
		Light			 -recognise that they need light in order to see things and that dark is the absence of light. -notice that light is reflected from surfaces. -recognise that light from the sun can be dangerous and that there are ways to protect their eyes. -recognise that shadows are formed when the light from a light source is blocked by a solid object. -find patterns in the way that the size of shadows 			 -use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye. -explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes. -use the idea that light travels in straight lines to explain why shadows have the same shape

	Y1	Y2	Y3	Y4	Y5	Y6
Living Things and their Habitats		Pupils should be taught to: -explore and compare the differences between things that are living, dead, and things that have never been alive. -identify that most living things live in habitats to which they are suited. -describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other. -identify and name a variety of plants and animals in their habitats, including microhabitats. -describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food.		Pupils should be taught to: -recognise that living things can be grouped in a variety of ways. -explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment. -recognise that environments can change and that this can sometimes pose dangers to living things.	Pupils should be taught to: -describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird. -describe the life process of reproduction in some plants and animals.	Pupils should be taught to: -describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro- organisms, plants and animals. -give reasons for classifying plants and animals based on specific characteristics.

Working Scientifically - Progression of Skills – 2021/2022

CORE			Progression	of skills from Y1	– Y6				
SKILLS	Y1	Y2	Y3	Y4	Y5	Y6			
Asking questions (Q)	Ask simple questions and understand that they can be answered in different ways.	Ask simple questions and understand that they can be answered in different ways.	Ask relevant questions and using different types of scientific enquiries to answer them. Set up simple practical enquiries, comparative and fair tests.	Ask relevant questions and using different types of scientific enquiries to answer them. Set up simple practical enquiries, comparative and fair tests.	Plan different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary.	Plan different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary.			
Measuring and Recording (MR)	Observe closely, using simple equipment (like magnifying glasses). Perform simple tests (to find things out). Gather and record data (information) to help in answering questions.	Observe closely, using simple equipment (like magnifying glasses). Perform simple tests (to find things out). Gather and record data (information) to help in answering questions.	Make systematic, organised and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers. Record findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables. Gather, record, classify and present data in a variety of ways to help in answering questions.	Make systematic, organised and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers. Record findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables. Gather, record, classify and present data in a variety of ways to help in answering questions.	Take measurements, using a range of scientific equipment, with increasing accuracy, taking repeat readings when appropriate. Record data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs.	Take measurements, using a range of scientific equipment, with increasing accuracy, taking repeat readings when appropriate. Record data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs.
